

Saving & Printing an image from the slide show filmstrip

ft,
ad.

A snapshot of Spirits' Activities

Images are provided by several of our talented members. Do you have some images to share? Send them to the [Webmaster](#).

The slide show will start automatically. To pause the slide show, simply place your mouse over the image. Thumbnails now appear as a filmstrip below the main image. Click on any image in the filmstrip to go directly to that image. You may advance or rewind by clicking the arrows on the sides-of the image.

What's special about the Spirits of St. Louis R/C Flying

Right Click on the thumbnail of the photo you wish to download or print.

From that menu select "Open Link in a New Tab"

This opens the full size image in a new tab, it should be the very next tab in your list

Right-Click and select "Save Picture as.." then navigate to the folder where you wish to save the image. You can print the image from there.

If you wish, you may print directly from this picture by selecting "Print Picture..." Sometimes this option does not work or may give poor results. It is usually better to save the image and print afterward.
